WRK Mobile Learning Platform
Curriculum Catalog
2018 - 2019

WRK

The **WRK** Mobile Learning Platform implements a blended model consisting of online courses, participatory learning and onsite sessions to meet customer needs under multiple modalities.

Our online curriculum allows students to work in a self-paced atmosphere using comprehensive digital media, videos and interactive content during times that are convenient for (To) them.

The participatory aspect of the learning environment allows students to engage in an interactive online discussion forum whereas they express their own opinions to weekly guided work-related topics by posting responses to the question, viewing peer postings on the same topic, while receiving community feedback on their own comments. All discussion forums are managed by an educational professional to keep the responses guided toward meeting the learning objective. Also, unique to this process is that, prior to posting a response, students cannot review comments or postings of others before they submit a post. Participatory learning has been proven to be an excellent method to facilitate individualized thought, formulation of opinion and the demonstration of content knowledge.

We also provide a guided curriculum for case managers so that they can conduct weekly or monthly skills activities that are thematically related to the students training.
